

Product description-

CM1-RL series provides a simple economic programmable speed/velocity table, it 20.0mm, 5-digit LED display, press the key to set the display range and its anti-jamming design and reliable quality, simple installation, you can meet the needs of general measurement of speed/velocity.

This instrument also has 2 group relay outputs, 1 analog output, or 1 groups RS485 (Modbus RTU mode) communication features three a (More features please refer

to page description). Operation press the inner design, the more human-no action can be avoided, especially suitable for all kinds of machinery used.

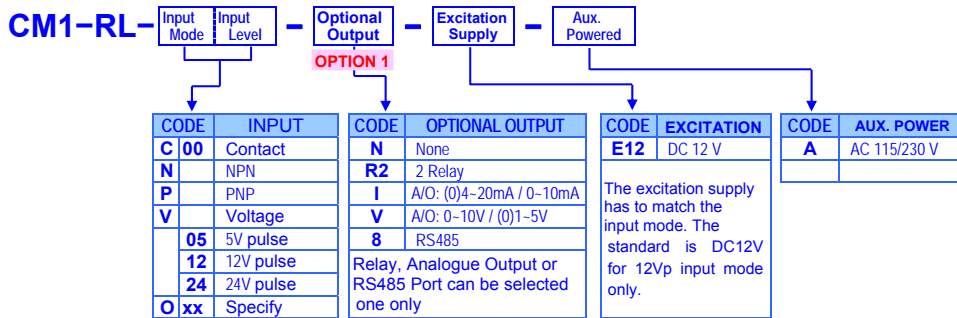

Feature :

- Free input frequency of 1Hz~6KHz, does not need to specify the frequency range input mode (NPN, PNP, and forth.) and pulse dial switch level by means of direct switch
- Purchase 2 to attach three to choose a group of relay outputs, 1 analog output, or 1 groups RS485 (Modbus RTU mode) communication
- Operation press the inner (in front), according to field requirements set display scope; Terminal straight into design, bad problem-free installation depth only 72mm

Application :

- Tie in with the adjacent switches, photoelectric switch speed/wire speed display, control and RS485 data collection
